

BIOMEDICAL GERONTOLOGY

VOL.16 No.1 April 1992

Abstract : the 14th Symposium of Japan Society
for Biomedical Gerontology

HOMEOSTATIC DEFENSE SYSTEMS AND AGING IN HUMAN AND ANIMAL MODELS

(April 11, 1992, at Sanjyo Kaikan, University of Tokyo)

Joint Sponsor : Tokyo Metropolitan Institute of Gerontology

Opening address	K. Imahori
Chairman : K. Imahori	
Morphological aging of the human brain —For neuropathological diagnosis of SDAT— Neural cell death	T. Mizutani 5 H. Hatanaka13
Chairman : H. Mori	
Advance in research on Alzheimer's disease Cytokines that work in the brain	T. Miyatake23 T. Tabira25
Chairman : H. Ohoka	
Aging of hypothalamus-pituitary system in human Senescence of the hypothalamo-hypophyseal system in animal models	T. Yamaji31 S. Kawashima37
Chairman : T. Hosokawa	
Hormones as cytokines in immune system Senescence of immune function in human Senescence of immune functions in animal models	S. Muramatsu45 S. Negoro51 C. Kurashima57
Chairman : N. Maruyama	
Neural modulation of the immune system Analyses of mammalian neurogenesis by gene-targeting and gene-trapping in mouse embryonic stem cells	T. Hori67 S. Aizawa75
General discussion	Chairman : K. Hirokawa
Commentator	Y. Ikawa
