

BIOMEDICAL GERONTOLOGY

Vol.19, No.2, October, 1995

PLENARY LECTURE:

- Is life span in *C. elegans* determined by a biological clock or by a cascade?
P. L. Larsen and D. L. Riddle 72

SYMPOSIUM SESSION:

- S1. Apoptosis/apobiosis in cell senescence and life span.
S. Tanuma 73
- S2. Clonal lifespan and cultural lifespan in *Paramecium tetraurelia*.
Y. Takagi and N. Yamamoto 74
- S3. The 77 kDa protein can be an indicator of longevity gene action.
I. Yonemura, A. Okano, M. Michikawa and H. Hasekura 75
- S4. Molecular genetics of Werner syndrome.
T. Miki, J. Nakura and T. Ogihara 76
- S5. Regulation of programmed neuronal cell death by calcium.
T. Koike and S. Tanaka 77
- S6. Ascorbate transporter activity and its correlation with apoptosis and ageing.
T. Kanetate, N. Nagao and N. Miwa 78
- S7. Implications of protein oxidation in aging.
S. Goto 82
- S8. Modified LDL, atherosclerosis and endothelium-derived NO.
M. Yokoyama, S. Kawashima and K. Hirata 83
- S9. Atomic Bomb Radiation and Aging.
K. Kodama, F. Kasagi, S. Fujiwara, M. Yamada and K. Neriishi 84

MINI-SYMPOSIUM SESSION:

- MS1. Mechanism of amyloid fibril formation.
T. Shinoda, K. Takeda, H. Kozono, M. Kimura, H. Kaji, M. Taoka
and K. Ueda 85
- MS2. A hypothetic transformation mechanism of A β from a physiological state
to a pathological state.
H. Mori 86

- MS3. Human β -secretase and its significance in β -amyloid accumulation.
A. Matsumoto, H. Baba and Y. Fujiwara 87
- MS4. Effects of GIF and ApoE isoforms on the neurotoxicity of β -amyloid.
Y. Uchida and A. Ueki 88

REGULAR PAPERS:

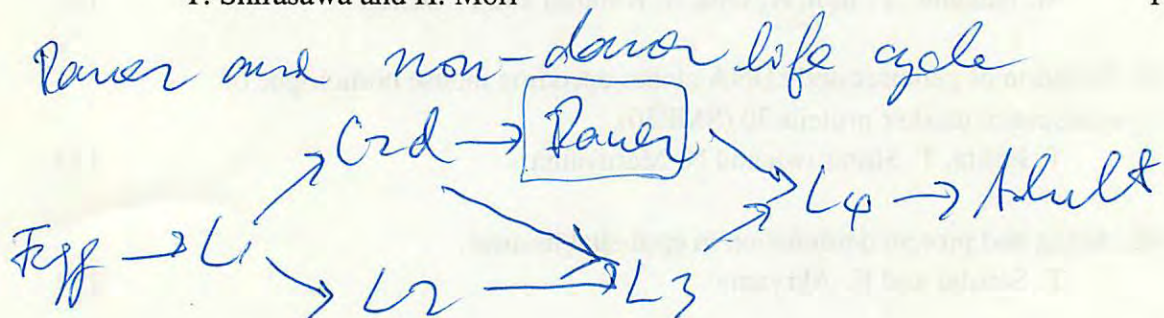

1. Synaptic aging of cholinergic neurons.
S. Ando and Y. Tanaka 89
2. Release of cholecystokinin (CKK) from synaptosomes in young and old rats.
M. Ohta, Y. Tanaka, M. Masuda, K. Miyasaka and A. Funakoshi 90
3. Effects of aging on releases of CCK and PP stimulated by Neuromedin-C (N-C) in isolated vascularly perfused rat pancreatico-duodenojejunum.
S. Kanai, K. Miyasaka and A. Funakoshi 91
4. Attenuated response of blood flow in the cerebral cortex to focal electrical stimulation of the nucleus basalis of Meynert in aged rats.
H. Hotta and A. Sato 92
5. Liver-derived neuronal activator (LDNA) enhances neuronal regeneration in an aged mouse retina explant.
H. Horie, M. Takano, T. Kadoya and Y. Inagaki 93
6. Function of neural adhesion molecule F3 and aging.
K. Watanabe, K. Takeuchi, H. Hosoya and K. Shimazaki 94
7. Correlation between brain atrophy and behavioral/learning disturbances in SAMP10.
N. Seriu, K. Ohnishi, H. Yagi, I. Akiguchi, A. Ohta, K. Higuchi and M. Hosokawa 95
8. Spontaneous running-wheel, circadian rhythms and life span in senescence accelerated mouse.
Y. Yanagidaira, A. Okano, I. Yonemura, A. Sakai, H. Hasekura 96
9. Age-related changes of pulmonary mechanics in Senescence-Accelerated Mouse (SAMP6).
T. Hirai, Y. Takubo, Y. Oku, M. Mishima, K. Kuno, T. Matsushita, K. Higuchi and M. Hosokawa 97
10. Age-related changes of collagen content in the lungs of senescence-accelerated mouse (SAM).
Y. Takubo, T. Hirai, Y. Oku, M. Mishima, K. Kuno, T. Yaxia, K. Higuchi and M. Hosokawa 98

11. The effects of radiation in senescence accelerated mice. - age - related changes in the brain (II) -
M. Kishikawa, M. Sakae, M. Iseki, H. Kondo, T. Shimazaki, S. Sasano and H. Sato 99
12. Dark cells and apoptosis in the aging process
T. Sato, Y. Ito and H. Tauchi 100
13. Dietary restriction suppresses age-related decline of proliferation and increase of cell death in hepatocytes of senile rats.
Y. Higami, I. Shimokawa, M. Tomita, T. Okimoto and T. Ikeda 101
14. Islet atrophy by energy restriction.
M. Yoshioka, M. Tsukada, Y. Miyamura, T. Mogi. M. Sasaki, M. Naruse, Y. Wada and A. Koizumi 102
15. The mechanism of islet atrophy by energy restriction.
Y. Miyamura, M. Yoshioka, M. Tsukada, T. Mogi and M. Sasaki 103
16. The short and long-life span mutants of *Caenorhabditis elegans* and oxidative stress.
H. Adachi, T. Hayashi, T. Yanagawa, Y. Fujiwara and N. Ishii 104
17. Effects of oxygen on various phenotypes of the long-life mutants of nematode *C. elegans*.
S. Honda and Y. Honda 105
18. SOD gene expression in a long-life mutant of nematode, *C. elegans*.
Y. Honda, N. Ishii and S. Honda 106
19. The telomere change in SAM (Senescence-Accelerated Mouse) with aging -- examined by a non-RI detection system.
A. Takahashi, H. Kitado, M. Hosokawa and K. Higuchi 107
20. Morphology of mitochondria in aged cultured skin fibroblasts and those from a Werner syndrome patient.
S. Murano, A. Nakazawa, N. Morisaki and Y. Saito 108
21. Studies on Ju-myo protein. 12. Effect of anti-JP antibody on the life span of *Drosophila melanogaster*.
I. Yonemura, A. Okano, M. Michikawa, Y. Nishimaki, Y. Yanagidara, H -G. Zhou, K. Sato and H. Hasekura 109
22. Statistical mechanics of aging.
K. Suematsu, M. Kohno, Y. Komada and Y. Kawazoe 110
23. Comparison of different tissues for age-dependent increase of mutant frequency in mouse.

T. Ono, Y. Miyamura and T. Kitano	111
24. Effects of food restriction on oxidative DNA damage during aging process. S. Tahara and T. Kaneko	112
25. A new type of 8-hydroxyguanine-DNA endonuclease. T. Kaneko, S. Tahara, M. Tanno and T. Taguchi	113
26. DNA polymerase β involved in base excision repair of oxidative DNA damage. T. Taguchi, S. Jinno, T. Mizuuchi and K. Kida	114
27. Changes in antioxidant capacity of rat brains exposed to higher concentration of oxygen. F. Gomi and Y. Uchida	115
28. Age-associated changes in erythrocyte Cu, Zn-SOD in individuals with Down syndrome: Accelerated inactivation of the enzyme with aging. K. Yoneda, K. Iinuma and T. Shinoda	116
29. 2D-PAGE analysis of carbonylated proteins in tissues of young and old animals. A. Nakamura and S. Goto	117
30. Age change of mouse T cells by flow cytometric analysis. A. Wakikawa, M. Utsuyama, N. Ishiyama, M. Kitagawa and K. Hirokawa	118
31. Molecular mechanism of signal transduction in T cells and its age change : II. M. Utsuyama, C. Kurashima and K. Hirokawa	119
32. Effect of Mao-bushi-saishin-to, a traditional herb medicine, on influenza virus infection in aged mouse. Y. Takagi, A. Maeda, N. Ueba, N. Higashi, H. Yamamura and Y. Nunoura	120
33. Different effects of aging on T cells for antibody production and those for DTH response in SAMP1 mice. E. Toichi, M. Baba, T. Hosokawa, M. Hosono and M. Hosokawa	121
34. Noradrenergic regulation of immune function of splenocyte of Senescence Accelerated Mouse (SAM). Y. Nishimura, A. Okubo, M. Hosono, M. Hosokawa and T. Hosokawa	122
35. Effect of a stressor on the age-associated changes in the regulatory mechanism of autoantibody production. V. Effect of noradrenaline on the autoantibody producing system in MRL/n spleen B cell. S. Okada, A. Aoike and T. Hosokawa	123

36. Terminal response of V β 8⁺ T cells responding to staphylococcal enterotoxin B in aged mice.
M. Hosono, Y. Aiba, Y. Katsura and T. Hosokawa 124
37. Effects of dietary restriction on serum Apo A-IV induction in young and old mice by fasting: Western blot analysis.
S. Araki and S. Goto 125
38. Effects of age and long-term dietary restriction on cell renewal of somatotropes.
I. Shimokawa, Y. Higami, M. Tomita, T. Okimoto and T. Ikeda 126
39. Effects of aging and dietary restriction on activity of monkey serum in promoting fibroblast migration and proliferation.
H. Kondo, M. A. Lane, Y. Yonezawa, D. K. Ingram, R. G. Cutler and G. S. Roth 127
40. Characteristics of myocardial action potentials of energy-restricted mice.
Y. Wada, M. Tsukada and A. Koizumi 128
41. Activities and characterization of ouabain binding in cardiac (Na⁺+K⁺)-ATPase from energy restricted mice.
M. Tsukada, Y. Wada and A. Koizumi 129
42. Immunohistochemical study of enkephalin in the brain of energy-restricted mice.
M. Naruse, K. Ohtomo and A. Koizumi 130
43. Development of diet for rodents in aging research. 5. Study of the low protein and low energy diets.
S. Shumiya, K. Kuramoto, H. Ito, I. Suwabe and Y. Shimogouri 131
44. Epidemiological study on the nutritional status of elderly residents at urban and rural area in Pndang, Indonesia.
M. Nakano, Y. Itoh, K. Oba, S. Kondoh and F. Oenzil 132
45. Isolation of genomic and cDNA clones encoding mouse homologue of senescence marker protein-30 (SMP30).
T. Fujita, T. Shirasawa and N. Maruyama 133
46. Aging and protein deimination in epithelial tissuses.
T. Senshu and K. Akiyama 134
47. Polymorphism of ApoA-II gene effect on the metabolism of lipoprotein in mice.
J. Wang, K. Kitagawa, K. Kogishi, M. Hosokawa and K. Higuchi 135
48. Construction of TMIG-2DPAGE (Two-dimensional gel protein database) to support researches on proteins involved in cell growth, differentiation, functioning and aging.
T. Toda, K. Kaji and N. Kimura 136

49. Effect of restraint stress on B16 melanoma lung metastasis: relation to aging. J. Kanno, A. Wakikawa and K. Hirokawa	137
50. Changes in blood components levels of mouse by parabiosis. T. Nomaguchi	138
51. Aging of bladder function. S. Uchida, H. Hotta and A. Sato	139
52. Effects of arginine intake on glomerular and proximal tubule injury in aging rats. H. Ebisawa, M. Ichikawa, T. Ohzeki, A. Shirakawa and Y. Fujita	140
53. Treatment of age-associated glomerulonephritis. Y. Utsunomiya and N. Maruyama	141
54. The preventive effect of Kampo on senility. -Behavioral-pharmacological and morphological study using Boui-Jiou-Tou- M. Sakae, M. Kishikawa, M. Iseki, S. Kawaguchi, H. Kondo, S. Sasano and H. Sato	142
55. β -carbolinium and Parkinson's disease. Y. Kobayashi and K. Matsubara	143
56. First-order kinetic model of Alzheimer's β -amyloid fibril formation in vitro. H. Naiki and K. Nakakuki	144
57. Search for factors affecting on β /A4 aggragation. K. Takeda, H. Kozono, M. Kimura, H. Kaji, M. Taoka, K. Ueda, H. Mori and T. Shinoda	145
58. Racemization: Its biological significance on neuropathogenesis of Alzheimer's disease. T. Shirasawa and H. Mori	146
