

BIOMEDICAL GERONTOLOGY

Vol. 20, No. 2, June, 1997

PLENARY LECTURE:

- Molecular genetic approaches toward aging science
Y. Nabeshima 19

SYMPOSIUM SESSION:

- S-1 Sphingolipids as novel information molecule in CNS.
Y. Hirabayashi 20
- S-2 Voltage-dependent calcium channels in the brain presynapses and aging.
Y. Tanaka 21
- S-3 Imaging of protein kinase and phosphatase activities in living cells.
H. Higashi 22
- S-4 Membrane lipid dynamics and cytoskeletal organization.
S. Umeda 23

MINI-SYMPOSIUM SESSION:

- MS-1 Genomic information via INTERNET in life sciences.
T. Sano 24
- MS-2 Application of Green Fluorescence Protein for Neurobiology.
H. Takahashi 25
- MS-3 Studies using "brain slice-patch clamp" techniques on neurotransmission in the
CNS.
S. Konishi 26
- MS-4 New strategies for understanding activity-dependent neural plasticity.
K. Itoh 27
- MS-5 Single cell RT-PCR
M. Toda 28

REGULAR PAPERS:

- 1 Age-related changes of bones in female rats.
Y. Kobayashi 29
- 2 Aging and eyeground photograph
T. Imaizumi, T. Imagawa and T. Hosono 30
- 3 Age-related changes of the expression of genes encoding neuronal
growth-associated proteins (nGAPs).
N. Mori, M. Cao and T. Himi 31
- 4 Enhanced expression of mitochondrial genes in senescent cells.
T. Kumazaki, T. Sakano, T. Yoshida, M. Nishiyama and Y. Mitsui 32

5	WAF1/CIP1p21 and cell senescence: Promoter activity. X. Hengyi, T. Hasegawa, O. Miyaishi, K. Isobe	33
6	Function of BFCOL1 on mouse type I collagen gene expression with cellular senescence. T. Hasegawa, O. Miyaishi, K. Maehara, A. Takeuchi and K. Isobe	34
7	Tissue-specificity of age-associated increase of mutation frequency. T. Ono and K. Yamamoto	35
8	Sensitivity for the induction of base substitution mutations in premature senescence cells. K. Sugita	36
9	Age-related change in the activity of 8-hydroxydeoxyguanosine endonuclease in the liver of rat exposed by ⁶⁰ Co. T. Kaneko, S. Tahara, M. Tanno and T. Taguchi	37
10	SMP30 (Senescence marker protein-30/hepatic calcium binding protein) and intracellular calcium homeostasis.-Activation of the plasma-membrane Ca ²⁺ pumping ATPases (PMCA) by SMP30. T. Fujita, H. Inoue, T. Kitamura, N. Sato, T. Shimosawa and N. Maruyama	38
11	Age-related alteration of glucose-regulated protein expression. O. Miyaishi, Y. Ninomiya, T. Hasegawa, A. Takeuchi, K. Maehara and K. Isobe	39
12	Analysis of proteins in fibroblasts of Werner's patients by two-dimensional gel electrophoresis: An application of TMIG-2DPAGE protein database. T. Toda, N. Kimura, M. Satoh, M. Sugimoto and Y. Furuichi	40
13	Lateral diffusion constants of proteins and lipids in cell surface membranes as a physiological parameter of aging. K. Kitani, M. Ohta and S. Tanaka	41
14	Adrenocortical zonation in C57BL/6J mice purchased from NIA Aging Farm. S. Tanaka, T. Segawa, I. Zs.-Nagy and K. Kitani	42
15	Inhibition of human fetal skin fibroblast migration by human serum: Effects of serum fractions, serum proteins and donor age. H. Kondo, Y. Yonezawa and H. Ito	43
16	A study on isoform-specific effects of apolipoprotein E on neuronal cells in culture. M. Michikawa and K. Yanagisawa	44
17	Inhibitory effect of apolipoprotein E on Alzheimer's β -amyloid fibril formation in vitro. H. Naiki and K. Nakakuki	45
18	Pathological significance of modified proteins with isomerized aspartyl residues in Alzheimer's disease T. Shirasawa	46
19	Change in monoamine metabolism in the aged rat brain W. Maruyama, T. Tsukada, S. Tanaka and K. Isobe	47
20	Alteration of glycoprotein in the brain during aging Y. Sato, A. Kobata and T. Endo	48
21	Effect of focal stimulation of nucleus basalis of Meynert on pathological decreases in cerebral blood flow in rats M. Kurosawa and S. Iijima	49

22	Effect of glucocorticoids on hippocampus and dentate gyrus in mice: their role in aging of spatial learning N. Cehn, S. Kobayashi and T. Machida	50
23	Expression of nitric oxidase in lumbar motoneurons of aged rats K. Kanda, E. Nomoto and S. Asaki	51
24	Liver derived neuronal activator inhibits neuronal cell death in adult rat DRG in vitro H. Horie, I. Sakai, H. Saito, M. Sato, T. Kadoya, Y. Inagaki and R. Nozawa	52
25	Aging effects on pelvic nerves innervating bladder in rats H. Hotta, H. Nakayama and K. Noda	53
26	Mouse senile amyloidosis: Verification of fibril conformation dependent fibrilization model. K. Higuchi, T. Matsushita, K. Kogishi, J.-W. Xia Chen, T. Chiba, T. Yokota, T. Ishihara and M. Hosokawa	54
27	Relationship between age-related immune dysfunction and senile amyloidosis in shortened-life length in SAM. E. Toichi, M. Hosono, T. Hosokawa, K. Higuchi and M. Hosokawa	55
28	SAMP8 showed learning and memory deficit in contextual conditioning. A. Ohta, I. Akiguchi, N. Seriu, K. Ohnishi, T. Matsushita, K. Higuchi and M. Hosokawa	56
29	Altered gene expression of myelin basic protein in the brain of senescence-accelerated mouse (SAMP8). R. Takahashi, Y. Makabe and S. Goto	57
30	Age-related structural changes of the thoracic aorta in senescence-accelerated mouse (SAM). B. Zhu, T. Matsushita, H. Fujisawa, T. Nishikawa, A. Ohta, M. Kimoto, H. Jujo, K. Higuchi and M. Hosokawa	58
31	Identification of the genes responsible for accelerated senescence: Genome mapping of SAM strains using microsatellite markers. X. Chen, M. Shimizu, T. Matsushita, W. Jing, M. Hosokawa and K. Higuchi	59
32	Potentialities and limitations of aging rodents as an animal model for studies on aging. K. Kitani, S. Kanai and K. Miyasaka	60
33	Regulatory effects of noradrenaline on the antibody-forming function by splenocytes of senescence-accelerated mouse (SAM) Y. Nishimura, M. Hosono, M. Hosokawa and T. Hosokawa	61
34	Stress-induced augmentation of Th-1 type cytokine production in Senescence Accelerated Mouse. T. Hosokawa, H. Moriyama, Y. Nishimura and M. Hosono	62
35	Age-associated changes of B lymphocyte functions. R. Nagasawa, T. Imasawa and N. Maruyama	63
36	Analysis of the mechanism of the accumulation of memory T cells with age. K. Ohkusu, K. Isobe	64
37	Modification of immune functions by diet containing high vitamin E. A. Wakikawa, J. Kanno, J. Shiraishi, A. Wakabayashi, M. Utsuyama, M. Kitagawa and K. Hirokawa	65
38	Oral tolerance and aging. A. Wakabayashi, Y. Eishi, M. Utsuyama and K. Hirokawa	66

39	A new concept on thymic involution: Regulation of thymic function by hypothalamus. M. Utsuyama, S. Kobayashi and K. Hirokawa	67
40	Age change of proliferative activity of lymphocytes in human thymus. J. Shiraishi, M. Kitagawa and K. Hirokawa	68
41	Effects of dietary restriction and age on physiological parameters in rats. Y. Ito, T. Sato, H. Tauchi and S. Momose	69
42	Regulation of the heat shock response in rats by nutrients. K. Rokutan	70
43	Development of diet for rodents in aging research. 6. Study of the low protein and low energy diets (2). S. Shumiya, K. Kuramoto, H. Ito, M. Kaneko and T. Hayakawa	71
44	Effect of dietary restriction on the accumulation of lipid peroxide in rat skin during aging. S. Tahara and T. Kaneko	72
45	The expression level of somatostatin receptor subtypes mRNA in the anterior pituitary -Impacts of aging and dietary restriction- K. Yanagihara, I. Shimokawa, Y. Higami, M. Tomita, T. Kawahara, T. Okimoto and T. Ikeda	73
46	Role of Fas and c-myc in age-related apoptosis of hepatocytes-effect of dietary restriction- Y. Higami, I. Shimokawa, T. Okimoto, M. Tomita and T. Ikeda	74
47	Impacts of long-term dietary restriction on plasma IGF-I and type1 IGF receptor in rats. M. Tomita, I. Shimokawa, Y. Higami, K. Yanagihara, M. Iwasaki, H. Ohtani, T. Kawahara, T. Okimoto and T. Ikeda	75
48	Immunohistochemical study on advanced glycation end-products in rat tissues -Impacts of aging and dietary restriction- I. Shimokawa, Y. Higami, S. Horiuchi, M. Iwasaki and T. Ikeda	76
49	Effects of deprivation of torpor under a high housing temperature of 30°C on the survival curve, immune and endocrine systems and lipid peroxidation of dietary-restricted mice. Y. Wada, M. Tsukada, T. Kayo and A. Koizumi	77
50	Beneficial effects of dietary calcium and long-term, light exercise on BMD in aging rats. M. Ichikawa, H. Ebisawa, A. Shirakawa, J. Inoue, M. Utsuyama, L. N. Panlasigui and Y. Fujita	78
51	Reexamination of the Gompertz Law K. Suematsu	79
52	Modification of aging by diabetes mellitus: A hereditary diabetic mouse model (Akita) of autosomal dominant mode of inheritance as a useful researchtool. A. Koizumi, T. Kayo, M. Yoshioka, M. Tukada and Y. Wada	80
53	Linkage analysis of the responsible locus and immunohistochemistry of pancreatic islets in mouse model of diabetes mellitus. T. Kayo, A. Koizumi, M. Yoshioka, M. Tsukada and Y. Wada	81
54	Cellular proliferation in pancreatic islets of a new mouse diabetic model. M. Tsukada, T. Kayo and A. Koizumi	82

55	Overexpression of beta-amyloid precursor protein-like gene improves the viability of developing <i><Drosophila></i> . T. Aigaki, S. Ki-Hyeon	83
56	Life span and cell death in <i>C. elegans</i> . N. Ishii	84
57	<i>Daf</i> mutants with life span abnormality of <i>C. elegans</i> and oxidative stress. K. Yasuda, H. Adachi, Y. Fujiwara, N. Ishii	85
58	Age-related change of protein carbonylation in <i>C. elegans</i> . A. Nakamura, K. Yasuda, Y. Sakurai, N. Ishii, K. Nishizawa and S. Goto	86
59	Effects of oxidative stress on the life span in the nematode <i><C. elegans></i> S. Honda and Y. Honda	87
60	Oxidative stress resistance in the long-life mutants of the nematode <i><C. elegans></i> . Y. Honda and S. Honda	88
61	Factors to determine survival and death in mixed batch cultures of two species of <i><Paramecium></i> Y. Takagi	89
62	Incidences of TUNEL positive cells in the pancreas and the changes in pancreatic exocrine function in young and old rats. A. Jimi, M. Ohta, S. Kanai, Y. Sato, M. Masuda, A. Funakoshi and K. Miyasaka	90
